Question: 1 of 45

Time Remaining: 00:54:39

Bessie Coleman, the first civilian licensed Black pilot in the world, was born in 1892 to sharecroppers in Texas, where she attended a segregated school and worked with her family in the cotton fields. She dreamed of becoming a pilot but no flight schools in America would accept her, so she moved to France to earn her pilot's license.

When she returned to the U.S., she wanted to open a flight school for Black students. She became a stunt flier and performed for paying audiences, which she insisted be desegregated. Following her death in a plane crash in 1926, the Bessie Coleman Aero Club was established in Los Angeles in 1929. She was inducted into the National Aviation Hall of Fame in 2006.

Stimulus: 1 of 2

Which of the following statements correctly identifies the sequence of events in the reading?

- ☒ Born to sharecropper parents, Bessie Coleman moved to France to take flight training and then returned to the United States as a stunt pilot.
- ☐ Bessie Coleman's parents were sharecroppers who sent her to France as a child to become a pilot, after which she returned and opened a flight school.
- ☐ After life as a sharecropper, Bessie Coleman raised money as a stunt pilot to attend flight school in France.
- ☐ Bessie Coleman was a pilot, then a sharecropper, who lived in France, where she was inducted into the National Aviation Hall of Fame.

Question: 6 of 45

Time Remaining: 00:52:29

The Farallon Islands, or *Devil's Teeth*, as they are referred to by sailors, are a group of small islands with rocky, barren terrain and treacherous underwater currents, 48 km (30 miles) off the coast of San Francisco, California. Although the islands are small, with a combined total land area of 0.41 km² (0.16 square miles), they are positioned in a major ocean current, which enables them to house dense populations of birds, rodents, seals, and other water mammals.

The abundance of wildlife first attracted Russian and American fur traders in the early 1800s, who then nearly eliminated the seal population in the area. The islands then became an agricultural resource for San Francisco during the Gold Rush era when egg companies began harvesting bird eggs on the islands. In 1863, violence between rival egg companies erupted on the islands (known as the "Egg War"), which inadvertently attracted national attention and provoked lawmakers to pass legislation to protect and rehabilitate the islands' natural ecosystem.

In 1881, an executive order was passed that decreed eggging illegal on the Farallons. This ended private enterprises on the islands and was reinforced in 1909 when President Theodore Roosevelt created the Farallon Reservation to restrict human access and preserve the northern islands. Protection was expanded in 1967 to include all the Farallon Islands, and over time many of the islands' original inhabitants have returned.

The Farallons are now home to the world's largest population of western gulls. Seals have returned, as well as otters and sea lions, which in turn attracts great white sharks. The combination of sharks, underwater currents, and jagged coastline are probably what earned the Farallons their nickname "Devil's Teeth," though it hasn't stopped a few adventurous people from swimming. Four people have completed the 30-mile swim from the islands to San Francisco; the fastest person

Stimulus: 1 of 6

Which of the following supports the detail that the Farallon Islands are a natural home to many animals?

* * * * *

☒ Ocean currents☐ Abundant land☐ Human presence☐ Lush landscape

Question: 22 of 45

Time Remaining: 00:43:34

You might think the largest animal on Earth is the blue whale, and you would be correct. Blue whales can reach a length of 98 ft long and can weigh as much as 198 tons. However, in the Blue Mountains of eastern Oregon, there is an organism currently covering an area of 3 square miles and estimated to weigh at least 7,500 tons: the *Armillaria ostoyae* fungus, also known as the honey mushroom or shoestring fungus. Though *A. ostoyae* is found in other places, such as Michigan and Germany, only Oregon's fungus has grown to such an enormous size. The humongous fungus is estimated to be anywhere from 2,000 to 8,000 years old, and it continues to grow by 1 to 3 feet every year.

Stimulus: 2 of 2

Which of the following best describes the theme of the report?

- ☐ Humankind versus nature
- ☒ Extraordinary natural phenomena
- ☐ Nature as beauty
- ☐ Hierarchy in nature

Time Remaining: 00:40:38

Alice stared at the basement door, trying to gather enough confidence to open it and march down the stairs like she owned the place. Because she did—or she would, once she finished paying her mortgage in 30 years. Alice took a deep breath and yanked the door open. She marched down the stairs, only to stop abruptly at the bottom. Because she was face to face with not a ghost at all. It was a calico cat, one who looked utterly unimpressed by her brave journey into the basement.

Which of the following words from the passage indicates time sequence or the order of events?

• • • • •

- ☒ Once
- ☐ Because
- ☐ Maybe
- ☐ But

Pharmacy Technician

St. Francis Hospital
200 Hospital Drive, Mapleton, Vermont

Duties include: Filling medication carts for each nursing station, filling TPNs, preparing surgical drips, maintaining anesthesia trays for 6 ORs. Five years of hospital experience and certification required. FT/rotating schedule.

Which of the following applicants best fits the advertised job position based on their qualifications?

.....

Dash has been the only pharmacy tech at Johnson Hospital for 6 years. He recently took continuing education credits to update his certification. He prefers to work days, but can work around a flexible schedule as needed.

Carole has been an ER nurse in the St. Francis hospital system for 7 years. She just passed her certification exam, but she has no pharmacy experience.

Ben is finishing up his 10th year as a certified pharmacy tech at PharmRite retail pharmacy. His availability is flexible, and he wants to move into a hospital setting.

Amal has 7 years of experience working as a pharmacy tech at Oakdale Hospital. She does not have national certification and can only work 8 a.m. to 5 p.m., Monday through Friday.

Question: 17 of 45

Time Remaining: 00:46:05

FLAG

It can be difficult to write sometimes, especially if you are creating something brand new. It is even harder when you must write while following certain rules. Some writers thrive when there are limits, like poets. Many poetry forms follow very specific rules, like sonnets or elegies; you can't just throw some words on a page and call it a haiku. On the other hand, some successful poets really enjoy breaking the rules. They will refuse to use proper punctuation or follow any sort of structure. So then what good are the rules, if you can just break them and still succeed? That doesn't make any sense. I guess that is why I am not a poet.

Stimulus: 1 of 2

Which of the following is the most likely source for most of the author's statements in the passage?

- ☐ The Online Writing Lab at Purdue University
- ☐ The Archive of Recorded Poetry and Literature
- ☒ The writer's own knowledge about writing
- ☐ The writer's local university library
