Which of the following terms identifies the author's tone in the passage?

Scientific

Sarcastic

Formal

Informal

Stimulus: 2 of 2

Which of the following best identifies the author's purpose in the passage?

To describe how to train a puppy

To argue that dogs shouldn't bite

To narrate what it's like to have a new puppy

To inform the reader about illness in dogs

Question 3 of 45

Research shows that tipping in a restaurant has little to no effect on service. What tipping does do is enable restaurateurs to pay less than the federal minimum wage to servers and defend on customers to make up the difference between servers salaries and the minimum wage. The U.S. federal minimum wage for servers is \$2.13 per hour. Although minimum wage varies from state to state, it is safe to say that customers are paying the lion's share of servers' salaries. This practice leads to resentment on the part of customers, and it devalues servers. It's time to abolish tipping and pay employees a living wage. The result may well be happy servers who provide excellent service to grateful customers.

Stimulus: 1 of 2

Which of the following is the writer's main argument?

Customers are resentful of having to help pay the salaries of servers.

The federal rate for servers is too Low.

Servers should provide excellent service no matter how much they make.

The custom of tipping should be abolished, and servers should be paid a living wage.

Stimulus: 2 of 2

Which of the following is evidence the writer provides to support the main argument?

Customers are grateful for excellent service.

Minimum wage varies from state to state.

Servers do not provide good service because of their low pay.

Customers pay a large percentage of servers' salaries.

Excerpt from a suspense novel

Shia looked up from his monitor, rubbed his eyes, and stared down the dark hallway toward the CFO's office. He was certain a sound had come from behind the closed door. It was a heavy thump, like someone had dropped a bowling ball.

There shouldn't be anyone else here at this hour, Shia thought to himself as he looked at his watch. The only illumination came from Shia's computer monitor. His office was on the thirtieth floor, far too high to get much more than a faint glow from the street lights below. Shia slowly stood up before reaching down to turn off the computer screen, hoping to hide in the darkness. He considered turning on his phone's flashlight, but his thoughts were cut short by a loud crash followed by the unmistakable tinkling of shattered glass

Shia froze, as if he were caught by the gaze of Medusa. The initial doubt that he would actually find someone snooping around the CFO's office had turned to an icy fear that gripped his lungs and would not let him breathe. His heart was pounding loudly in his ears, he knew whoever was in his boss's office must be able to hear it.

Another crash, followed by a loud howl that he was sure couldn't be human, shocked Shia into motion. He broke into a run... in the opposite direction. He sprinted for the emergency stairwell and rushed downward, jumping over the last few steps of each flight. Shia didn't stop running until he had burst through the ground floor exit to the parking garage and found his car. His heart continued racing until he was at home in bed. He sent his boss a single text message before turning over and trying to force himself to sleep: "I don't think I can work late anymore."

Stimulus: 1 of 5

Which of the following contains only key points of the passage?

There is a thump like a dropped bowling ball, a loud crash, and the tinkling of shattered glass. Shia is working at his computer, there is little light, and no one else should be in the building. Shia is working late, he hears mysterious noises, and he is frightened enough to leave work.

There are frightening noises in the office, Shia goes home, Shia sends his boss a text.

Stimulus: 2 of 5

Which of the following is the topic of the excerpt?

A building with poor lighting and security

A boss's expectations of an employee

A mysterious experience at work

An employee who is easily scared

Stimulus: 3 of 5

Which of the following is the tone of the passage?

Tense

Aggressive

Incredulous

Witty

Stimulus: 4 of 5

Which of the following sentences from the passage supports the conclusion that the passage takes place in the 21st century?

"His office was on the thirtieth floor, far too high to get much more than a faint glow from the street lights below."

"He sent his boss a single text message before turning over and trying to force himself to sleep: 'I don't think I can work late anymore.

"Shia didn't stop running until he had burst through the ground floor exit to the parking garage and found his car."

"Shia froze, as if he were caught by the gaze of Medusa."

Stimulus: 5 of 5

Which of the following sources would be the best resource to find a list of other suspense novels?

An encyclopedia entry about the suspense genre

A public library's digital catalog

A New York Times bestseller list

The online reviews of the novel

An Interesting Birthday Party

On Saturday afternoon, local eccentric Dr. Oliver Creekstone held a remarkable 90th birthday party at his countryside estate. Present were 3,000 guests, four zebras, two monster trucks, and a famous bagpipe player from Scotland. Though pleased with the entertainment, attendees reportedly were shocked that the complimentary buffet contained only boiled asparagus and pickled carrots. At nightfall, the party was treated to a stunning and seemingly endless fireworks display. According to our sources, Dr. Creekstone felt that next year's birthday party would have to be even bigger and more interesting. "We'll need at least seven more zebras," he said.

Stimulus: 1 of 3

Which of the following conclusions is supported by all of provided about the birthday party?

Dr. Oliver Creekstone is a carnivorous eater.

The Creekstone estate is a half-acre lot lined with tree

The Creekstone estate cannot hold seven more zebra

Dr. Oliver Creekstone is an unconventional fellow

Stimulus: 2 of 3

Which of the following quotes from a guest at the birthday party contains a stereotype?

"I once thought Dr. Creekstone to be irresponsible, but this party was well-planned and executed."

"The food provided was inedible; nevertheless, this party turned my sour mood around."

"I would never want my own birthday party to have smelly zebras and loud fireworks."

“Considering the elderly age of Dr. Creekstone, he was surprisingly articulate and intelligent.”

Stimulus: 3 of 3

“Though pleased with the entertainment, attendees reportedly were shocked that the complimentary buffet contained only boiled asparagus and pickled carrots.”

Which of the following words from the sentence above has a negative connotation?

Complimentary

Shocked

Reportedly

Contained

Clara Barton Timeline

1821: Clara Barton is born in North Oxford, Massachusetts.

1831: Barton cares for her brother David after he falls from a roof and is severely injured.

D.C. to work as the first female

1855: Barton moves to Washington federal patent clerk

1861: Barton begins gathering and distributing food, clothing, and medical supplies to wounded soldiers during the Civil

1862: Barton works on the front lines as a self-taught nurse.

1865. After the war, Barton begins identifying anonymous soldiers to be properly buried through the Office of Missing Soldiers.

1869. Barton travels to Europe, assisting with preparing military hospitals and supplying aid to the poor.

1881: Barton petitions President Chester A. Arthur to open an American branch of the International Red Cross organization.

Stimulus: 1 of 3

According to the timeline, which of the following events happens second?

Barton works as a federal patent clerk.

Barton works on the frontlines of the Civil War.

Barton travels to Europe.

Barton identifies anonymous soldiers.

Stimulus: 2 of 3

Which of the following words as used in the timeline indicates the chronology of events in Barton's life?

Through

After

Front

First

Stimulus: 3 of 3

Which of the following information indicates Clara Barton has international influence?

1865: After the war, Barton begins identifying anonymous soldier to be properly buried through the Office of Missing Soldiers

1881: Barton petitions President Chester A. Arthur to open an American branch of the International Red Cross organization.

1861: Barton begins gathering and distributing food, clothing, and medical supplies to unded soldiers during the Civil War

1869. Barton travels to Europe, assisting with preparing military hospitals and supplying aid to

the poor.

Question: 16 of 45

Office Memo

To: Staff

From: CEO

Date: June 18, 2021

Subject: Naps

Employees,

In recent company-wide audits, many employees have reported fatigue at work. Combined with our acquisition of 10 major projects. this year, I'm concerned about our employees' productivity and health.

According to a 2008 study, napping for 60 minutes helped improve verbal memory, motor skills, and perceptual learning better than caffeine. Many successful companies have adopted the practice of work naps, in industries like tech, manufacturing even NASA!

Starting today, we will be providing a designated nap room in each office building near the gym and cafeteria to help employees take care of their bodies and minds, so they can be happier, healthier, and more productive

Thank you,

Stimulus: 1 of 2

Which of the following first prompted the CEO to consider implementing nap rooms?

Reading the 2008 study about napping in the workplace

Having extra rooms available near the gym and cafeteria

Learning that NASA allows napping during the workday

Company-wide audits that reported employee fatigue

Stimulus: 2 of 2

Which of the following additional pieces of information supports the claim that napping during the workday will help employees "be happier, healthier, and more productive"?

A study showing that the best time of day for a nap is between 2 and 3 p.m.

Rested people have better impulse control, so they are more likely to choose nutritious food over junk food,

In 1999, National Napping Day was founded in response to Daylight Saving Time.

Multiple companies have designed special seats or pods specifically for getting the optimal workplace nap.

Question: 18 of 45

Lexington and Concord

The majority of history scholars agree that the open warfare portion of the American War for Independence began in two small Massachusetts towns. Lexington and Concord. To stop the British from discovering military supplies hidden in Concord, the American Minutemen attempted to stall or halt the British Regulars in Lexington Common

While the opposing factions were facing off against one another, a shot was fired from an unknown source, causing hostilities to break into violence. After the skirmish at Lexington settled, multiple people from both sides lay dead and the British continued their way toward Concord

Stimulus: 1 of 3

Which of the following could accurately subtitle this passage, following "Lexington and Concord"?

A

The Full Armies Face Off

In the State of Massachusetts

The Start of the Revolution

American March from the Sea

Stimulus: 2 of 3

Which of the following best describes the tone of the passage?

Objective

Skeptical

Patronizing

Nostalgic

The best part about going to the theater is the feeling of being transported into a story. As soon as the curtain rises, you can forget about the chairs that make you feel like you've been squished into a sardine can and embrace wherever the story takes you, if only for a short while. The emotions in the play become your emotions. The lives of the characters become your life. From a drama about a family in financial crisis to a comedy about a play gone wrong, there is no limit to where the theater can take you.

Stimulus: 1 of 3

From the passage, which of the following statements represents a logical conclusion about the author

The author also enjoys concerts and movies.

The author loves to attend theatrical productions

The author finds theatre seating comfortable.

The author prefers musical comedies,

Stimulus: 2 of 3

Which of the following phrases best describes the author's experience in the theater?

“The theater can transport you onto the stage”

"Like you're in an emotionless state"

"Like you've been squished into a sardine can"

"No limit to where the theater can take you"

Stimulus: 3 of 3

Using evidence from the passage, which of the following conclusions about the author can the reader infer?

They enjoy the décor of most theaters.

They are overly emotional and dramatic.

They go to the theater as often as possible.

They would rather be at a concert.

Hedy Lamarr, the Inventor

Hedy Lamarr was a woman of many talents. She was first known as a European film actress in the 1930s. She began starring in American films with MGM Studios in the late 1930s and early 1940s. Some of her more popular films included *Boom Town* (1940) and *White Cargo* (1942), however, her roles generally did not include very many spoken lines and she became bored. To relieve this boredom, Lamarr took up inventing.

Hedy Lamarr did not have any formal training, but she did not allow that to stop her from teaching herself in her spare time. Although she had a number of failed inventions, such as an improved traffic light and a carbonated drink, Lamarr did not stop coming up with ideas. She even spent time working with the science engineering team employed by Howard Hughes, the aviation tycoon.

During World War II, Lamarr learned that one of the military's new technologies, radio-controlled

torpedoes, were too easily jammed and redirected. She came up with a type of radio signal that changed, or "hopped," frequencies and was unable to be tracked or disrupted. With the assistance of her friend George Antheil, she was able to design the system and patent it in August 1947

Unfortunately, the United States Navy was not interested. The technology of the era wasn't quite good enough to easily implement Lamarr's system, and the Navy was not particularly interested in civilian inventions at the time. It wasn't until 20 years later, during the Cuban Missile Crisis, that a version of Lamarr's system began appearing on Navy ships

The work Lamarr and Antheil did creating this frequency-hopping system led to many technologies that are often taken for granted today. Their work led to the development of cell phones, Bluetooth, and Wi-Fi. Just think, we might not have any of those things if Hedy Lamarr had been given more interesting roles!

Stimulus: 1 of 6

Which of the following sentences contains information that is important enough to be included in a summary of the passage?

She came up with a type of radio signal that changed, or "hopped," frequencies

She even spent time working with the science engineering team employed by Howard Hughes.

Some of her more popular films included Boom Town (1940) and White Cargo (1942)

Unfortunately, the US Navy was not interested

Stimulus: 2 of 6

Which of the following conclusions can be drawn about Hedy Lamarr's acting career?

Hedy Lamarr wanted more opportunities to speak while acting

Hedy Lamarr was content with her contribution to film.

Hedy Lamarr worked in America films with MGM Studios.

Hedy Lamarr was the first European actress of the 1930s.

Stimulus: 4 of 6

Which of the following can the reader infer about the author's point of view when they state:

“The work Lamarr and Antheil did creating this frequency-hopping system led to many technologies that are often taken for granted today.”?

The author believes that the frequency-hopping system has damaged the potential of modern electronics.

The author believes we spend too much time using technologies derived from Lamarr's work

The author believes that we have underestimated the value of the contributions of lesser-known inventors

The author believes that the work of Lamarr and Antheil was instrumental to the victory in World War II.

Which of the following sentences uses italics correctly?

The scientific name for the domestic dog is *Canis lupus familiaris*

The orchestra will perform Beethoven's Ninth Symphony.

William Carlos Williams was the United States Poet Laureate in 1952

We read Lincoln's Gettysburg Address in my American history class.

Martin and Sons: Job Injuries, Medical Malpractice, and Personal Injury. Free Initial Consultation.

Smith and Jones: No Fee Unless You Win Your Case, Specializes in Worker's Compensation Legal Issues.

Thorn and Thomas: Employment Law, Contract Negotiations, and Employment Safety Issues.

Williams Attorneys: State and Federal Employment Fairness, Medical Malpractice Lawsuits.

Reasonable Hourly Rates Plus Percentage of Settlement.

An employee believes she was injured on the job due to an unsafe situation. Based on the advertisements above, which of the following attorneys provides the necessary experience to pursue her claim and would ensure the employee the lowest overall cost?

Thorn and Thomas

Martin and Sons

Williams Attorney

Smith and Jones

Which of the following can be used to find journal articles on a given topic?

An encyclopedia

A periodical index

A handbook

A style guide

TEAS 7 English Section

Stimulus: 1 of 1

Singing is my favorite activity.

"Singing" functions as which of the following parts of speech in the sentence above?

Noun

Adverb

Preposition

Adjective

Question: 2 of 37

Surely, he thought, | can't trust this enticing yet dubious offer, although | could use the opportunity more than I'd like to admit.

Which of the following parts of speech is the word "although"?

Adverb

Participle

Interjection

Conjunction

Question: 3 of 37

The very lively lady was riding a beautiful parade float.

Which of the following parts of speech is the word "lively" in the sentence above?

Adjective

Adverb

Conjunction

Interjection

Question 4

According to the prefix "Intra-," which of the following is the best definition of the word "Intravenous"?

Between the veins

Around the veins

Within the veins

Against the veins

Question: 5 of 37

Which of the following transitional expressions should a student use to compare two ideas?

Likewise

Therefore

In addition

For instance

Question: 6 of 37

Which of the following best describes the peer review process?

It requires time and attention to complete.

Incomplete drafts are typically submitted for the process.

All comments from peer reviewers should be implemented.

Teamwork among participants is not required.

Question: 9 of 37

Time Remaining 00:28:23

Because of all your running around, their clients are confused about whose in charge, and the company is losing its competitive edge.

Which of the following contractions should be used to correct the error in the sentence above?

who's

they're

It's

you're

Question: 10 of 37

Which of the following sentences is punctuated correctly?

A carpenter must use certain tools hammers, saws, chisels - to finish a job.

A carpenter must use certain tools, hammers, saws, chisels, to finish a job.

A carpenter must use certain tools - hammers, saws, chisels to finish a job.

A carpenter must use certain tools - hammers, saws, chisels - to finish a job.

Question: 11 of 37

Which of the following sentences supports the following thesis statement?

Organic gardening can be as simple or complex as you choose to make it.

The origins of organic gardening date back to ancient times.

Organic gardening requires the ability to recall scientific names of plants.

The popularity of organic gardening has increased because of the public's concern about food safety.

Organic gardening ranges from basic composting to a chemical analysis of the soil.

Question: 12 of 37

The top-secret blueprints were for an intergalactic spaceship.

Which of the following is the meaning of the prefix "inter-" as used in the sentence above?

Into

Past

Below

Among

Question: 13 of 37

Tim

Which of the following sentences correctly uses a transition word?

Gilda lives near campus; likewise, the grocery store is not within walking distance.

Gilda attends college; thus, she also works full-time at an engineering firm.

Gilda is a hardworking student, therefore, she earned a good grade on her essay.

Gilda likes math class, nevertheless, she enjoys anything pertaining to numbers.

Question: 14 of 37

Which of the following sentences correctly follows the rules of capitalization?

I plan to enroll in College next year.

The A1 Plumbing Board of Directors gave every employee a raise.

The Geography students took a class trip to the Rocky Mountains.

Even though he moved to New York, he was born in a Western town.

Question: 17 of 37

Which of the following sentences correctly uses subject-verb agreement?

Statistics are an interesting subject. However, statistics are often misleading.

Statistics is an interesting subject. However, statistics is often misleading.

Statistics are an interesting subject. However, statistics is often misleading.

Statistics is an interesting subject. However, statistics are often misleading.

Question: 18 of 37

Which of the following is a thesis statement?

While Abel Tasman is the first European credited with seeing New Zealand, James Cook is recognized for mapping the country.

The Maori people are indigenous to New Zealand.

Maori culture should receive more emphasis in the history curriculum of New Zealand

schools.

New Zealand's national flag depicts four red stars and a silver fern.

Question: 19 of 37

Wow, that was a fast car!

Which of the following parts of speech is the word *Wow* in the sentence above?

Preposition

Conjunction

Interjection

Adverb

Question: 22 of 37

According to the prefix "pre-", which of the following words defines "preliminary"?

Concluding

Introductory

Repeating

Anticipatory

Question: 23 of 37

"The skies are clear, and I predict no rain in the future," the weather reporter announced.

foreseable

forseeable

foreseeable

forseeible

Question: 24 of 37

Which of the following sentences correctly uses subject-verb agreement?

The dogs in our backyard growls late at night.

The tennis balls roll into the parking lot.

These two girls in the first row is best friends.

Computers has made our jobs easier.

Question: 25 of 37

Which of the following sentences contains formal language, rather than informal language?

If you can't take the heat, get out of the kitchen.

The blue-footed booby is a magnificent specimen.

When traveling alone, be on the lookout for pick-pockets.

I didn't want to tell on my friends, but the teacher gave me no choice.

Question: 26 of 37

Which of the following sentences is punctuated correctly?

The ladies's hats were all purple, they looked so pretty.

We sat down to eat our meal outside; the night was beautiful.

The horse rode to our house, the beach, and around the church, before he started to tire.

The strong heavysset fighter won his first fight, and he was featured in the newspaper.

Question: 27 of 37

Which of the following is an example of second-person narrative voice?

'You go to the window because someone is knocking insistently on the front door.'

I wanted to visit the art museum to see the new sculpture exhibit.

We are planning a trip to Florida for our vacation in January.

She won first place at the county fair with my homemade blueberry pie recipe.

Question: 28 of 37

Which one of the following sentences contains a dangling modifier?

Adequate lighting is important for anyone who is studying or reading.

The contented puppy sat by the sleeping young child.

Drivers in our state are confused by the outdated driving law.

My brother had an old truck that sat by the garage that needed paint.

Question: 30 of 37

Which of the following is an example of accidental plagiarism?

Copying information from a source and identifying it as your own

Submitting a paper that was written by a friend

Summarizing information without including a source credit

Forgetting to include an in-text citation for information

According to the prefix "In-" which of the following words defines "incredulous"?

Sympathetic

Disbelieving

Convinced

Weary

Question: 33 of 37

Which of the following sentences is written correctly?

"Don't stay out too late," My mother said.

"It's time to go home." | told him.

“Were you late to the show," he asked?

"I have to leave!" she said.

Question: 35 of 37

Which of the following sentences is the least formal in style?

I've got a ton of experience with computers from school.

I gained significant experience with computers while attending collele.

I gained a lot of experience with computers while | was a student in college.

I have a lot of experience with computers from my college days.

Question: 36 of 37

Which of the following is the plural spelling of the word "loaf"?

Loafs

Loafs

Loafes

Loaves

Question: 37 of 37

According to the prefix "inter-," which of the following phrases defines "Interplanetary"?

Around a planet

Beyond planets

Above a planet

Between planets

TEAS 7 Science Section

Question: 5 of 50

A researcher collects high-resolution photographs of the Earth taken from outer space at annual intervals for the last decade. This data would be most useful to analyze which of the following?

Deforestation in the rainforest

Human movement during crises

Migration patterns of large whales

Weather patterns during hurricanes

Question: 6 of 50

Which of the following is a property of water?

Water is made up of one molecule of hydrogen and two molecules of oxygen.

Water dissolves polar and ionic compounds.

Water requires less heat than ethanol to raise its temperature.

Solid water is more dense than liquid water.

Question: 8 of 50

Which of the following body cavities is subdivided into the thoracic and abdominopelvic cavities?

Cranial

Vertebral

Ventral

Dorsal

Question: 9 of 50

Which of the following describes the function of tendons?

Tendons attach bones to ligaments.

Tendons attach two bones.

Tendons attach skeletal muscles to ligaments.

Tendons attach skeletal muscles to bone.

Question: 10 of 50

Which of the following bases is found in RNA but is absent from DNA?

Uracil

Cytosine

Thymine

Adenine

Question: 12 of 50

Histones are proteins associated with which of the following?

Blood

Hair follicles

Sperm cells

DNA

Question: 13 of 50

Which of the following structures is a flap of cartilage that prevents the movement of food into the trachea?

Larynx

Epiglottis

Pharynx

Glottis

Question: 14 of 50

If a portion of a strand of DNA bases reads S' AGCTAGCGT 3', what would the sequence of bases on the complementary strand read?

5 TCGUTCVCU 3

3 TCGATCGCA 5'

3 AGCTAGCGT S'

SUCGAUCGCA 3'

Question: 15 of 50

Which of the following occurs during inhalation?

The ribcage lowers.

The volume of the thoracic cavity decreases.

Air moves from areas of low pressure to areas of high pressure.

The diaphragm moves downward.

Question: 17 of 50

Which of the following statements correctly describes the change in coat coloring of an Arctic fox from brown in summer

Neither the phenotype nor the genotype of the fox changes.

The fox's phenotype changes, but the genotype does not.

The fox's genotype changes, but the phenotype does not.

Both the phenotype and genotype of the fox change.

Question: 19 of 50

Which of the following describes why water has a concave, or downward-curving, meniscus when poured in a glass beaker?

The adhesive forces with the glass are greater than the cohesive forces.

The cohesive forces with the glass are greater than the adhesive forces.

Glass has a higher density than water.

Water has a higher density than glass.

Question: 22 of 50

Which of the following is a function of a catalyst?

To increase the product yield

To increase the activation energy of a reaction

To increase the rate of a reaction

To convert a nonspontaneous reaction to a spontaneous reaction

Question: 21 of 50

Which of the following body systems develops from the same origin tissues as the lungs?

Neuromuscular system

Gastrointestinal system

Genitourinary system

Musculoskeletal system

Question: 23 of 50

Which of the following is a weakness of a correlational study?

Inability to control independent variables

Cannot be replicated

Too many variables to control

Cannot determine causation

Question: 25 of 50

Lifelong protection after exposure to a virus such as chickenpox is due to which of the following types of immunity?

Active

Nonspecific

Transplantation

Innate

A mutation of a portion of a DNA molecule changed the resulting mRNA sequence from AUU-GGG-UUC to CUU-GGG-UUC. Using the table below, predict the resulting amino acid sequence.

From Met-Gly-Leu to Leu-Gly-Phe

From tle-Gly-Phe to Leu-Gly-Phe

Question: 26 of 50

The following diagram summarizes the carbonic acid-bicarbonate ion buffer system of the blood.

Which of the following equations shows the reaction that takes place when there are excessive protons (H^{**}) in the blood?

Question: 27 of 50

A scientist predicts that germinating beans will use more oxygen than non-germinating beans.

This prediction following?

A hypothesis

Data collection

A conclusion

An observation

Question: 28 of 50

An equal mass of which of the following states of matter could completely fill either a 100 ml. or 500 mL. container?

Solid

Gas

Mixture

Liquid

Question: 29 of 50

Carbohydrates are composed of which of the following?

Amino acids

Monosaccharides

Isoprenoids

Nucleic acids

Question: 30 of 50

The shortening of a sarcomere in skeletal muscle is directly due to the interaction of which of the following?

Acetylcholine and acetylcholinesterase

Dynein and kinesin

Myosin and actin

Pepsin and pepsinogen

Question: 31 of 50

A vasectomy is a procedure in which the vas deferens are cut. Which of the following describes why a vasectomy leads to infertility?

The vasectomy blocks the movement of sperm from a testis into the epididymis

The vasectomy blocks the movement of sperm from the epididymis into the urethra

The vasectomy blocks the movement of sperm from the ejaculatory duct into the bulbourethral gland

The vasectomy blocks the movement of sperm from the prostate gland to the bulbourethral gland

Question: 33 of 50

During muscle contraction, myosin is directly responsible for which of the following?

Releasing calcium from the sarcoplasmic reticulum

Binding to troponin molecules

Forming cross bridges with actin molecules

Initiating an action potential along the sarcolemma

Question: 34 of 50

Which of the following best describes adaptive immunity?

The initiation of internal defenses, such as phagocytes and natural killer cells

The body's barrier defenses, such as mucous membranes and secretions

The initiation of the inflammatory response

A response to specific traits of specific pathogens

Question: 35 of 50

Which of the following is an example of active transport?

Aquaporins in kidney cells that help concentrate urine

Movement of sodium and potassium across the cell membrane against their concentration gradients

Loss of water from a cell in a hypertonic solution

Movement of a substance from an area of high concentration to an area of low concentration

Question: 36 of 50

Which of the following describes the process by which solid carbon dioxide (dry ice) turns directly into carbon dioxide gas?

Evaporation

Condensation

Deposition

Sublimation

Question: 38 of 50

A student investigating the importance of wavelengths above and below the visible spectrum for

photosynthesis sets up an experiment as follows over a 2-month period, all with illumination at 1 meter distance from plants grown with the same soil and watering conditions

3 Arabidopsis plants exposed to ultraviolet light (UV) 3 Arabidopsis plants exposed to infrared light (IR)

3 Arabidopsis plants exposed to white light

At the end of the experiment, she finds that the IR-treated plants are scorched, the UV-treated plants have wilted, but the white light-treated plants are growing normally.

Which of the following statements is most likely to be correct?

Infrared light contains more energy than the other wavelengths.

The wavelength of light does not affect photosynthesis.

Wavelength of light is the only variable that has been changed between groups.

Three plants do not provide sufficient replications to draw a conclusion.

Question: 39 of 50

Which of the following is true if Koch's postulates are met regarding a disease?

The disease is hereditary.

The disease is noninfectious

The disease is the result of a dietary deficiency

The disease is caused by a microorganism

Question: 42 of 50

Which of the following layers of skin contains glands and hair follicles?

Stratum lucidum

Hypodermis

Stratum corneum

Question: 43 of 50

Which of the following vessels is responsible for carrying blood from the upper body to the right atrium of the heart?

Superior vena cava

Pulmonary veins

Pulmonary arteries

Aorta

Question: 44 of 50

Carbon has an atomic number of 6. Which of the following is true about the isotope C-12?

C-12 possesses 7 protons and 5 neutrons in its nucleus

C-12 possesses 6 protons and 6 electrons in its nucleus

C-12 possesses 7 neutrons and 5 electrons in its nucleus.

C-12 possesses 6 neutrons and 6 protons in its nucleus

Question: 46 of 50

Which of the following elements has the smallest atomic radius?

Sn

Si

C

Ge

Question: 48 of 50

A cell is placed in a hypertonic solution. Which of the following describes the resulting osmosis?

There is a net flow of water out of the cell.

There is a net flow of water into the cell

There is no flow of water.

The net flow of water into and out of the cell is zero.

Question: 49 of 50

Permanent damage to which of the following types of tissue in the spinal cord will cause paralysis?

Nervous tissue

Muscle tissue

Connective tissue

Bone tissue

Question: 50 of 50

When an ionic salt is dissolved in water, the ions CO_3^{2-} and K^+ are formed. Which of the following is the formula for the salt?

K₂CO₃

KCO₃

K₁C₂O₃

K(CO₃)₂

TEAS 7 Math Section

Question: 2 of 38

What is the area of a square that measures 3.1 mon each side?

9.61m²

9.1m²

6.2m²

12.4m²

Question: 3 of 38

Which of the following is $3\frac{3}{3}$ divided by $\frac{3}{12}$

$\frac{5}{12}$

$\frac{10}{10}$

$\frac{2}{5}$

$\frac{9}{10}$

Question: 4 of 38

Which of the following options correctly orders the numbers below from least to greatest?

235.971, 145.884, -271.906, -193.823

271.906, 235.971, -193.823, 145.884

-271.906, -193.823, 145.884, 235.971

-193.823, -271.906, 145.884, 235.971

145.884-193.823, 235.971, -271.906

Question: 6 of 38

The width of a rectangle is 4 inches (in) and the area of the rectangle is 32 in². Which of the following represents the length of the rectangle?

36 in

8in

128 in

28in

Question: 7 of 38

To rent tablecloths from a party rental vendor, there is an initial charge of \$40. There is an additional charge of \$5 per circular tablecloth (c) and \$3.50 per rectangular tablecloth (r). Which of the following equations represents the total cost (T) to rent tablecloths?

$5c + 3.5r + 40 = T$

$5c + 3.5r - 40 = T$

$5x + 3.5x + 40 = T$

$5x + 3.5c - 40 = T$

Which of the following is the value of x in the equation below?

$4x - 3 - 5x = 24$

Question: 10 of 38

A local law school reports that 74% of last year's graduates are employed by law firms, 3% work for the government, and 2% work for nonprofit organizations. The rest of the graduates work at jobs unrelated to law. Based on these outcomes, which of the following is the percentage of graduates working jobs unrelated to law?

21%

79%

5%

69%

Question: 11 of 38

For a school's annual budget, the total amount of money spent on supplies (s) and textbooks (t) cannot exceed \$12,000. Which of the following inequalities accurately represents this scenario?

$s + t \geq 512000$

$s + t < 512$

$s + t < 12,000$ (=)

$s + t > 512\,000$

Question: 12 of 38

A farmer needs to buy fertilizer for his farmland. The instructions on the bag of fertilizer say 49.5

pounds of fertilizer is needed for 1 acre of land. The farmer buys 2,000 pounds of fertilizer.

Which of the following is the approximate number of acres he can cover with the fertilizer he bought?

125

300

40

1,000

Question: 13 of 38

$4/2 * P / 29$ 1.369, 1.357

Using the numbers above, which of the following numbers is greatest?

43

Df=

1.369

1.357

Question: 14 of 38

A recipe calls for 2.5 teaspoons of vanilla. 1 teaspoon equals approximately 4.93 mL. Which of the following is the correct amount of vanilla in mL?

7.43 ml

5.33 ml

0.507 ml

12.325 mL

Question: 15 of 38

A patient's temperature was recorded in degrees Fahrenheit every hour for 8 hr. The temperatures in Fahrenheit were 99.0°, 99.2°, 98.7°, 99.3°, 99.7°, 98.6°, 100.0°, and 99.0°. Which of the following is the median temperature?

99 F

99.1 deg * F

99.5 deg * F

99 * 2 deg *F

Question: 16 of 38

A girl and her dog are playing tug of war with a piece of rope. The girl pulls on the rope with a force of 165 newtons (N) toward the east, and the dog pulls with a force of 190 N toward the west. What is the net force on the rope?

190 N toward the west

165 N toward the east

25 N toward the west

35 N toward the east

A lab scale weighs 3 pounds, 5 ounces. Which of the following is the scale's weight in ounces (oz)?

A 1 oz

35 oz

29 0z

53 oz

Question: 18 of 38

A family is planning a driving vacation and is estimating the cost of gasoline. While on vacation, the family plans to drive 3,000 miles. The car gets about 25 miles per gallon, and the cost of

gasoline is \$1.66 per gallon. Which of the following is the estimate for the cost of the gasoline for the vacation?

\$199.20

\$72.29

141.50

\$120.00

Question: 19 of 38

An employee discovers that 0.0025 of all products produced at a factory contain defects. Which of the following percentages does this represent?

0.25%

0.025%

2.5%

25%

Question: 20 of 38

To determine the insurance premium of a car, an insurance company considers the following determinants: the age of the car, the model of the car, and the mileage of the car. Which of the following is the dependent variable?

Age

Mileage

Insurance premium

Model

Question: 21 of 38

An athlete can run 6 miles in 51 minutes. At this rate, how many miles could the athlete run in 90 minutes?

10.6 miles

11.5 miles

45 miles

15 miles

Question: 23 of 38

Which of the following is the mean of the set of data below?

30, 29, 28, 30, 24, 12, 26, 33, 25, 23

30

Question: 27 of 38

$$7x - 6 = 3x - 26$$

Solve the equation above for x . Which of the following is the value of x ?

5

-5

-8

8

Question: 28 of 38

Which of the following is the correct conversion of $2\frac{3}{4}$ yards into inches?

75 inches

11 inches

99 inches

33 inches

Question: 29 of 38

A garden in the shape of a square has an area of 13 square feet. Each side of the garden has a length of 13 feet. Which of the following is the best decimal approximation for the length of each side?

45 feet

65 feet

3.6 feet

2.6 feet

Question: 30 of 38

Pat deposits \$600 in a savings account at a simple interest rate of 6% per year for 5 years. How much money will Pat have earned in interest at the end of 5 years?

\$95

\$180

136

1360

Question: 31 of 38

A teacher has asked all the students in the class which days of the week they get up after 8 a.m. Which of the following is the best way to display the frequency for each day of the week?

Scatterplot

Bar graph

Histogram

Pie graph

A survey of 500 teenagers was taken to see which sport was their favorite to watch on television. The pie chart above displays the results. Which of the following data sets (number of teenagers) was used to develop this pie chart?

Basketball, 120, football, 190; hockey, 90; soccer, 80; other 20

Basketball, 120, football, 190; hockey, 80; soccer, 90; other 20

Basketball, 240, football, 380, hockey, 160 soccer, 180, other 40

Basketball, 190 football, 120, hockey 90, soccer, 80, other 20

Question: 34 of 38

A pudding recipe for 50 people calls for 4 cups of sugar. Each bag of sugar contains 6 cups.

How many bags of sugar will be needed to make this recipe for 300 people?

8 bags

13 bags

4 bags

24 bags

The graph above compares the age of a car to its value. Which of the following is the age of the car when its value is \$12,500?

Greater than 3 years

Between 1 and 2 years

Between 2 and 3 years

Less than 1 year

Question: 36 of 38

Which of the following is the appropriate estimate of 1 teaspoon?

50 mL

5 mL

0.5L

5L

Question: 37 of 38

The table below shows the miles driven as a function of gallons of gas used. When the function is graphed, what does the ordered pair (6, 144) represent?

Gallons of Gas

The driver can go 144 miles with 6 gallons of gas

The driver can go 144 miles in 6 hours.

The driver can go 24 miles in 1 hour.

The driver can go 6 miles with 144 gallons of gas

Question: 38 of 38

A patient drives 19 miles one way to a medical facility for treatment. How far does the patient drive round-trip in 22 days of treatment?

836 miles

1.254 miles

418 miles
